## Phaseo

Regulated switch mode power supplies

ABL1REM/1RPM

60 to 240 W - Mounting on panel

ABL1REM/1RPM Phaseo range regulated switch mode power supplies

### Presentation

**ABL1REM/1RPM** Phaseo range regulated switch mode power supplies are specially designed to provide the d.c. voltage necessary for electrical equipment operating on a safety extra low voltage (SELV). Split into two ranges, they are able to meet the needs encountered in standard commercial machines.

These single-phase power supplies, with or without anti-harmonic distortion filter, conform to world-wide standards. Switch mode technology guarantees the quality of the output current with regulation below 3%.

As machine components, **ABL1REM/1RPM** Phaseo range power supplies must be easy to install; only setting-up may vary from one application to another. The ABL1 range has been specially designed for machine manufacturers.

**ABL1REM/1RPM** regulated switch mode power supplies are totally electronic and regulated. They provide the following benefits:

- A wide input voltage range from 85 to 264 V ~ and 120 to 370 V  $\overline{\text{---}}$  (not indicated on the product).
- Products with anti-harmonic distortion input filter.
- A high degree of output voltage stability, adjustable by potentiometer.
- Built-in thermal overload protection.
- Conformity to world-wide standards.
- UL 508, CSA and TÜV certifications.
- Overload and short-circuit protection.
- Considerably reduced weight.
- Identical mounting accessories for each model.

ABL1 power supplies for electrical equipment are split into two ranges :

- **ABL1REM**, single-phase:
  - 60 W for the 12 V  $\overline{\text{---}}$  version,
  - 60 W, 100 W, 150 W and 240 W for the 24 V  $\overline{\text{---}}$  versions.
- **ABL1RPM**, single-phase with anti-harmonic distortion filter:
  - 100 W for the 12 V  $\overline{\text{---}}$  version,
  - 100 W, 150 W and 240 W for the 24 V  $\overline{\text{---}}$  versions.

### Behaviour in the event of short-circuits

ABL1 power supplies are equipped with electronic and thermal overload protection. This protection resets itself automatically on elimination of the fault, which avoids having to take any action or change a fuse.

### Description

**ABL1REM/1RPM** regulated switch mode power supplies comprise:

- 1 Two fixing holes for M4 x 20 screws.
- 2 A 115/230 V input voltage selector (on 150 W and 240 W versions only).
- 3 A 4 mm<sup>2</sup> screw clamp terminal block for connection of the AC input voltage and DC output voltage.
- 4 A green LED indicating presence of the d.c. output voltage.
- 5 An output voltage adjustment potentiometer ( $\pm 10\%$ ).
- 6 A removable, transparent, clip-on cover.

### Selection of protection for the power supply primary

Type of mains supply Type of protection (2 poles protected)	~ 115 V single-phase			~ 230 V single-phase		
	Thermal-magnetic circuit-breaker		gG fuse	Thermal-magnetic circuit-breaker		gG fuse
	GB2 (IEC/CSA-c/US)	C60N (IEC) C60N (UL)		GB2 (IEC/CSA-c/US)	C60N (IEC) C60N (UL)	
ABL1REM12050	GB2DB07	24517	2 A	GB2DB07	24517	2 A
