MSC - MULTIFUNCTION SMART CALIBRATOR

HANDHELD UNIVERSAL CALIBRATOR

MSC (Multifunction Smart Calibrator) is a flexible device for maintenance and testing of sensors and process meters. With best-in-class accuracy at 0.05% for each type of input / output, MSC offers measurement, generation and simulation of analog and digital signals, temperature sensors and load cells. Data visualization and parameters setting are provided by multilanguage Windows PC software (MSC) with USB cable or Bluetooth 4.1 connection through the mobile app (MSC by SENECA) available for iOS and Android devices.
MSC includes programmable ramp generation functions, datalogging with data export in .csv format, application as Automatic Testing System through LabVIEW libraries and the management of many calibrators PC. Equipped with a rechargeable lithium polymer battery, MSC can power external devices and sensors and can be used without continuous power supply with 20 hours battery life.
The calibrator, with a archiving capacity up to 100,000 measurements, is suitable for professional and industrial use for PLC programmers, maintenance technicians, technical assistance, measurement laboratories, control -and calibration, industry (laboratories, workshops and production), quality control.
