

soft starter for asynchronous motor, Altistart 22, control 230V, 230 to 440V, 110 to 220kW

ATS22C41Q

Main

Range of product	Altistart 22			
Product or component type	Soft starter			
Product destination	Asynchronous motors			
Product specific application	Pumps and fans			
Component name	ATS22			
Network number of phases	3 phases			
[Us] rated supply voltage	230440 V - 1510 %			
Motor power kW	110 kW 230 V 220 kW 400 V 220 kW 440 V			
Factory setting current	388 A			
Power dissipation in W 177 W for standard applications				
Utilisation category	AC-53A			
Type of start	Start with torque control (current limited to 3.5 In)			
IcL starter rating	410 A for connection in the motor supply line for standard applications			
IP degree of protection	IP00			

Complementary

Assembly style	With heat sink		
Function available	Internal bypass		
Supply voltage limits	195484 V		
Supply frequency 5060 Hz - 1010 %			
Network frequency 4566 Hz			
Device connection	To the motor delta terminals In the motor supply line		
[Uc] control circuit voltage	230 V - 1510 % 50/60 Hz		
Control circuit consumption	20 W		
Discrete output number	2		
Discrete output type	Relay outputs R1 230 V running, alarm, trip, stopped, not stopped, starting, ready C/O Relay outputs R2 230 V running, alarm, trip, stopped, not stopped, starting, ready C/O		
Minimum switching current	100 mA at 12 V DC (relay outputs)		

5 A 250 V AC resistive 1 relay outputs 5 A 30 V DC resistive 1 relay outputs 2 A 30 V DC resistive 1 relay outputs 2 A 30 V DC inductive 7 ms relay outputs 3 (LI1, LI2, LI3) logic, 5 mA 4.3 kOhm 24 V <= 30 V Positive logic LI1, LI2, LI3 at State 0: < 5 V and <= 2 mA at State 1: > 11 V, >= 5 mA 0.41 lcl adjustable 750 Ohm Modbus 1 RJ45 Serial RS485 multidrop 4800, 9600 or 19200 bps 31 Phase failure: line Thermal protection: motor Thermal protection: starter CE Forced convection Vertical +/- 10 degree 425 mm 299 mm

Precautions

Standards

The Altistart 22 soft starter is compliant with pollution Degree 2 as defined in NEMA ICS1-1 or IEC 60664-1.

For environment pollution degree 3, install the Altistart 22 soft starter inside a cabinet type 12 or IP54.

A DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

ATS22 soft starters are open devices and must be mounted in a suitable enclosure.

Failure to follow these instructions will result in death or serious injury.

Air Circulation

Leave sufficient free space to help the air required for cooling purposes to circulate from the bottom to the top of the unit.

Overheating

To avoid the soft starter to overheat, respect the following recommendations:

- Mount the Altistart 22 Soft Starter within ± 10° of vertical.
- Do not locate the Altistart 22 Soft Starter near heat radiating elements.
- Electrical current through the Altistart 22 Soft Starter will result in heat losses that must be dissipated into the ambient air immediately surrounding the
- If several soft starters are installed in a control panel, arrange them in a row. Do not stack soft starters. Heat generated from the bottom soft starter ca

Mounting and Clearance

Wall mounted or Floor-standing Enclosure with IP 23 Degree of protection

Introduction

To help proper air circulation in the soft starter, grilles and forced ventilation can be installed.

ATS22C41Q

Connections and Schema

Connection in the motor delta winding in series with each winding

Wiring

ATS22 soft starters connected to motors with the delta connections can be inserted in series in the motor windings.

The following wiring requieres particular attention. It is documented in the Altistart 22 Soft start - soft stop unit user manual. Please contact Schneider Electric commercial organisation for further informations.

Example

A 400 V - 110 kW motor with a line current of 195 A (nominal current for the delta connection). The current in each winding is equal to 195/1.5 or 130 A. The rating is determined by selecting the soft starter with a permanent nominal current (ICL) just above this current.
