Z113-1

DOUBLE ALARM THRESHOLD WITH UNIVERSAL INPUT AND RELAY OUTPUT

Z113-1 is an alarm threshold with two relay output SPST from 3A 250V with a common contact. The module allows to select the input type via DIP-switch: voltage, current, potentiometer, thermocouple (TC), thermoresistance (RTD). Input, output, input filter, rejection and burn-out can be configured through Software (via front USB port),
